

Algebra 1 HONORS Semester Two Pace Chart Spring 2022

Note to Students: Algebra 1 is an EOC course. The end of course exam will cover all course content from segments 1 and 2. Since you will be tested on all standards from Algebra 1, you will need to cover ALL of the material from the entire course before the EOC date. Because of this, we may have a few weeks at the end of the semester for turning in late assignments, taking segment exams and catching up. Once I get a date for the EOC, I will send out more information and make sure you are fully prepared for the exam.
