

2025-26 School Year

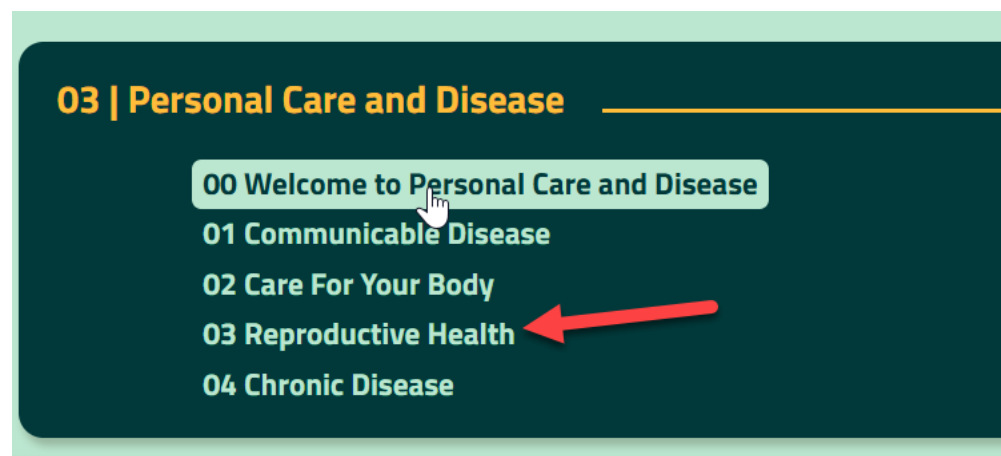

Dear Parent,

Your child will be receiving age-appropriate Reproductive Health and Disease Education in Module 3 (Segment 1), lesson 3.03 of their HOPE – Physical Education class as part of the health curriculum.

Pursuant to Florida Statue 1003.46, this reproductive health and disease curriculum is taught as part of disease awareness and prevention and the benefits of abstinence. St. Johns County School District adheres to all the guidelines of an abstinence-based curriculum.

Any student whose parent/guardian presents a written request to the principal shall be exempted from the instruction on reproductive health and disease, including HIV/AIDS, its symptoms, development, and treatment. A student so exempted shall not be penalized by reason of the exemption.

Parents may request to review the instructional resources used by contacting your child's school to schedule an appointment to review the curriculum on-site with school staff.

Sincerely,

St. Johns Virtual School Administration
